Jesseo:

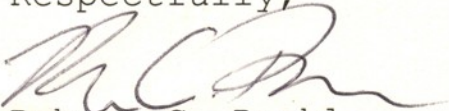

I needed a search engine optimization company because my business's Prostores website was brand-new, not generating any sales and was ranked very poorly in the various search engines.

In interviewing Jesseo I was impressed with their understanding of ecommerce and search engine optimization and decided to use their services. They provided an expert evaluation of my site and outlined a simple strategy to immediately generate web traffic and revenue. They implemented the improvements in an efficient and timely manner.

The results were outstanding. Their traffic generation services and SEO work has generated results which have translated into a tremendous increase in sales. The company continues to actively work on our site and produce outstanding results.

The investment we made in Jesseo's consultation and optimization services paid for themselves very quickly. Without hesitation, I am very pleased to recommend Jesseo as an SEO & ecommerce consultant.

Respectfully,

Robert C. Buehl

President
